Compact Disc Face Label Template

Use these measurements to size any artwork that you want to go from edge to edge of the label (full bleed).

These are the actual measurements of the printable area of the label. Use these measurements to determine size and spacing for any text and logos on the label.

- If you would like a background image to print to the edges of the label, use the measurements listed on the right side to size the image.
- Artwork should be at 300dpi.
- All important artwork and text must stay in the area between 1.75" and 4.5".
- Remember to include all fonts.
